How to use bike racks on buses

1 Be off your bike and prepared for the arrival of the bus. Wait until the bus has come to a complete stop before you load your bike from the curb-side of the bus.

4 Steady the bike and pull the support arm up and over the front wheel. Make sure the support arm is not resting on the bike's frame or fender.

7 Lower the support arm and lift your bike out of the rack toward the curb.

2 If the bike rack is empty, squeeze the metal handle and pull the bike rack down flat.

5 Remove all detachable items from the bike such as bags, air pumps and water bottles. Board the bus and pay your fare. Sit as close to the front as possible to keep your bike in view.

8 Bikes in the inside position can be easily removed by rolling them on the rack toward the curb. If the rack is empty fold it against the bus.

3 Load your bike in the inside position, putting the front wheel where indicated on the rack. If another bike is on the rack, load your bike in the open position.

6 When approaching your stop, let the bus operator know you will unload your bike. Exit through the front door of the bus.

9 Step away from the bus with your bike and wave to let the bus operator know you are clear of the bus. Wait until the bus has passed. NEVER cross in front of the bus.
